

Release Plan

Product: TasteBytes

Team Name: TasteBytes

Release Name: TasteBytes

Release Date: 6/10/17

Revision Number: 1

Revision Date: 4/12/17

High Level Goals

- Website used by management to add menus and possibly other restaurant information
- Downloadable application that creates POS system for all menus
- Prototype testing
- Continuous integration

User Stories

Sprint 1 (TasteBytes Website)

- As a user I want to easily be able to add and update menu items so I can have correct information about the items.
- As a user I want a fully functional dashboard so I can easily update my menu.
- As a designer, I want a basic UI in place so the site is pleasing to the eye and easy to navigate.

Sprint 2 (TasteBytes Electron Application)

- As a user I want to easily add orders to the POS system to save time.
- As a user, I want the POS system to be accessible on all platforms so I do not have to buy a new machine.
- As a user, I want the POS system to be touchscreen friendly for ease of use.

Sprint 3 (Polish, Clean Up and Additional Features)

- As a user I want to easily create a nicely formatted menu(s) to print out.
- As a user I want to be able to access the dashboard from different accounts so the software can be used for chain restaurants.
- As a user I want a seamless and responsive dashboard so I can easily manage menus from any device.

Product Backlog

We don't have a product backlog because our third sprint is reserved for implementing bonus features. Bonus features include multi-table support, menu pdf, multi-user support.
